

Re-Demonstration

Re-demonstration of understanding at TMSS is permitted, but only in such unique circumstances that one or both of the following conditions exist: A student encounters unforeseen/uncontrollable circumstances that the teacher agrees may have contributed to a poor summative result. The Summative Result is “inconsistent” with previous assessment evidence (Formative & Summative) relative to the applicable outcome(s) and the student has consistently shown them self to be active in their learning and responsive to feedback. In instances where one or both of the above mentioned criteria exist, requirements for re-demonstration (parent signature, tutorials, reflective correction, etc ...) will be left to the discretion of the applicable teacher.
